Summary

As a frontend developer, I am well-versed in web technologies. I have a strong understanding of frontend development principles and a passion for creating engaging user experiences. I am a proactive problem solver who takes pride in delivering high-quality code and collaborating with others is essential to me. I am eager to continue developing my skills and to make an impact in the industry.

Work Experience

Frontend Developer, *EnterERP*   10/2021 – present
                                                      İstanbul, Türkiye

- Developed, maintained, and shipped e-commerce websites using TypeScript and Next.js. Played a crucial role in projects such as Baxana 🔗 and Molimba 🔗, delivering high-quality and efficient solutions for thousands of users.

- Developed and shipped the official website for EnterERP 🔗 from scratch using Next.js and Tailwind. Implemented various SEO techniques to increase visibility and drive organic traffic to the website.

- Utilized WebSockets to implement real-time user activity monitoring, displaying the locations of active users on a globe interface, enabling the team to track user engagement, device usage, and geographic distribution to improve the user experience.

- Designed and implemented shipping, marketplace, and payment integrations from multiple vendors to create a shared API for internal use cases using TypeScript and Node.js.
